“We must voluntarily add a greater degree of responsibility to our natural desire for individual mobility. We should try to achieve results on the basis of freedom of thought and movement, and exploit every opportunity to combine the pleasure of motorcycling more effectively with ecological and economic needs.”

- a) Individual motorcyclists should develop riding habits to ensure full integration with other types of road users.
- b) Ride safely and avoid aggressive and competitive riding.
- c) Save petrol and reduce pollution by avoiding unnecessary idling of engines.
- d) Ride politely and limit noise pollution by using your horn only in an emergency.
- e) Noise annoyance. Use a standard or another quiet exhaust system and keep audio systems at a low level.
- f) Use only routes which are open to motorcyclists.
- g) Ride like a professional by riding at a quiet and unobtrusive pace when riding in groups.
- h) Respect nature by not travelling on paths which risk being damaged beyond a point of natural recovery.
- i) Protect wildlife and its natural habitat by riding intelligently.
- j) Ensure that your used oil, tyres, batteries and other recyclable items are properly recycled.
